About Appeals (Klagesensur)

This autumn, we are rolling out a range of new features and integrations to support Appeal Grading (Re-assessment) in Norwegian Higher Education. In addition to custom integrations (FS), other customers will also soon be able to benefit from the new features, which include:

- Support for multiple rounds of grading within a test
- Support for confirming marks and grades individually, per candidate
- + +

But, for practical reasons, during the Norwegian autumn rollout, we will document what's new in Norwegian only, and then, upon general release early 2019, share general documentation in English to all. We apologise for this delay.

For Norwegian institutions we highly recommend subscribing to the temporary email list for the Appeals project:

[Click here to subscribe to Norwegian updates on the Appeals project.](#)

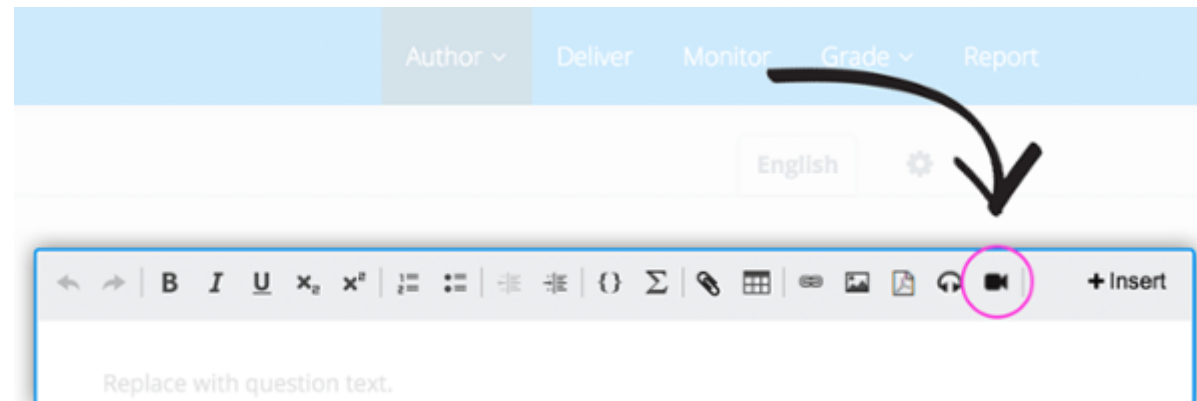

The purpose of this email list is to enable us at Inspira to communicate more directly to Norwegian Higher Ed about topics such as:

1. Important updates in the Norwegian documentation and rollout plans
 2. Invitations to Norwegian webinars about Appeals
 3. Updates to FS integration
-

New features in release

Add videos in question text

No activation required. Included in all plans.

It is now possible to add videos in the question text, which are added in the same way as the audio clips.

Highlights

- Supported in all item types, including forms and section stimulus
- Add multiple clips to same question
- Configure number of allowed playbacks
- Editable prompt text

- Supported file formats: MP4
- Offline support - Videos available during loss of internet connection
- Default maximum file size: 30 MB*

* Maximum allowed file size is configurable per account. To change the file size limit, please contact [Inspira Service Desk](#)

Set publishing restrictions for thesis submissions

No activation required. Included in all plans.

A high proportion of Bachelor's and Master's theses submissions contain sensitive information, making it necessary to prevent publication until a specific date.

This is now supported in Inspira Assessment, in the following ways:

- Support for setting a date for when publishing restrictions on a submission ends
- Support for restricting visibility of submissions in Urkund plagiarism reports

The restriction date can also be set per candidate using the Test API and is also included in the submission API enabling external systems to take the value into consideration.

API Webhooks

Closed beta

The Webhooks APIs allow external systems to subscribe to events in Inspira Assessment. The Webhooks are based on the Event Log system, used by the Inspira Assessment client, but with a limited set of events for which webhooks is currently supported.

LTI support

Closed beta

Learning Tools Interoperability (LTI) is a standard created by the IMS Global Learning Consortium that links content and resources to learning platforms. The Inspera LTI support allows the integration of Inspera Assessment in learning management systems such as Moodle, Canvas and Blackboard.

Contact [Service Desk](#) to participate in beta.

Other Improvements

- Improved sorting in Monitor (most notably in handling of fields with values containing spaces or other special characters)
- FS Person ID (Norway) is now visible and editable
- Improved handling of grading committee management for tests with many graders
- Fixed bug related to applying threshold values not always updating grade for all candidates
- Fixed bug allowing Planners (without extended access) to edit shared test templates
- Fixed bug preventing question from being saved if Author uses “&” in alternatives
- Fixed bug causing old committee membership to be shown when changing from group to individual delivery
