## Inspera Assessment was updated 24th November 2017

This minor release represents a major strategic area for Inspera: Providing you with flexibility in choice of tools and technologies. And sometimes even small updates can make a big difference in streamlining workflows.

We believe the new *Sketch Code Sheets* is one of those, enabling institutions to digitise pen and paper exams authored in Inspera Assessment. Just hand out questions, sketch sheets and *Sketch Code Sheets*. That way existing scantron integration can be utilised to efficiently capture all exams submissions and make them available for online *marking* and *grading* in Inspera Assessment.

### Yet another way to (not) use Inspera Assessment?

*Grade with Excel* has similar characteristics. It not only enable graders to set grades using Microsoft Excel, but also includes support for grading oral and paper and pen exams. This means it is possible to use Excel to register grades for any type of exam, including traditional, paper-based exams not conducted in Inspera Assessment at all.

The Inspera team

## Extended Release Webinar

**Tuesday 28th November 13.00 - 14.00**

Due to recent issues with Safe Exam Browser 2.1.7, we are extending the webinar with a SEB Questions & Answers session hosted by developer Jarle Presttun.

Welcome!

## In this update:

- Print sketch code sheets\* **BETA**
- Grade with Excel\* **BETA**
- Download marks and final grades as CSV\*
- Improvements and bug fixes

Starred items require activation through [Inspera Service Desk](#).

## Print Scantron sketch code sheets\* **BETA**

Sketch code sheets enable institutions to prepare and carry out completely paperbased exams with Inspera Assessment, retaining a 100% digital marking and grading process. The sheets can also be utilised as a fallback solution for on-screen tests, and as hand-outs in regular scantron tests, supplementing the on-screen codes.

Question	Sketch Code	Question	Sketch Code
1a	4279548	13	4279548
1b	1173729	14	1173729
1c	3731307	15	3731307
2a	2357829	16	2357829
2b	1649720	17	1649720
2c	1525831	18	1525831
3	2419080	19	2419080
4	5842670	20	5842670
5	7406475	21	7406475
6	5213432	22	5213432
7	2256717	23	2256717
8	1605759	24	1605759
9	2196904	25	2196904
10	9157155	26	9157155
11	5640099	27	5640099
12	7744314	28	7744314
13	7048878	29	7048878

## How it works

- Sketch code sheets can be printed with complete names or candidate ID only.
- In Deliver tool: Print question code sheets for all candidates at once. Sheets are automatically sorted by room and name.
- In Monitor: Print question code sheets for selected candidates, across tests.
- Upon Sketch Import, candidates with status "Not submitted" are not blocked as in regular scantron import, and the status for these candidates is automatically

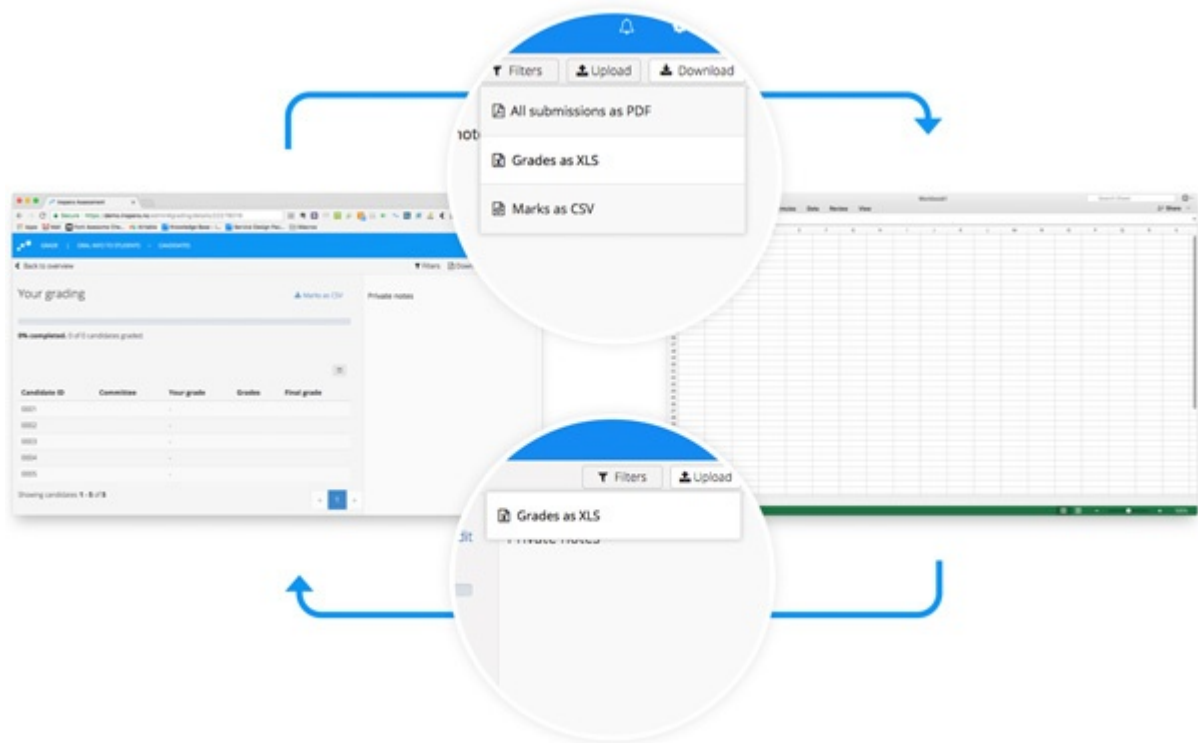

updated to "submitted" when the first sketch is imported.

Interested in participating in the beta? Contact [Inspera Service Desk](#).

---

## Grade with Excel\* **BETA**

Grade with Excel enable graders to set and import own grades in Excel.

### How it works

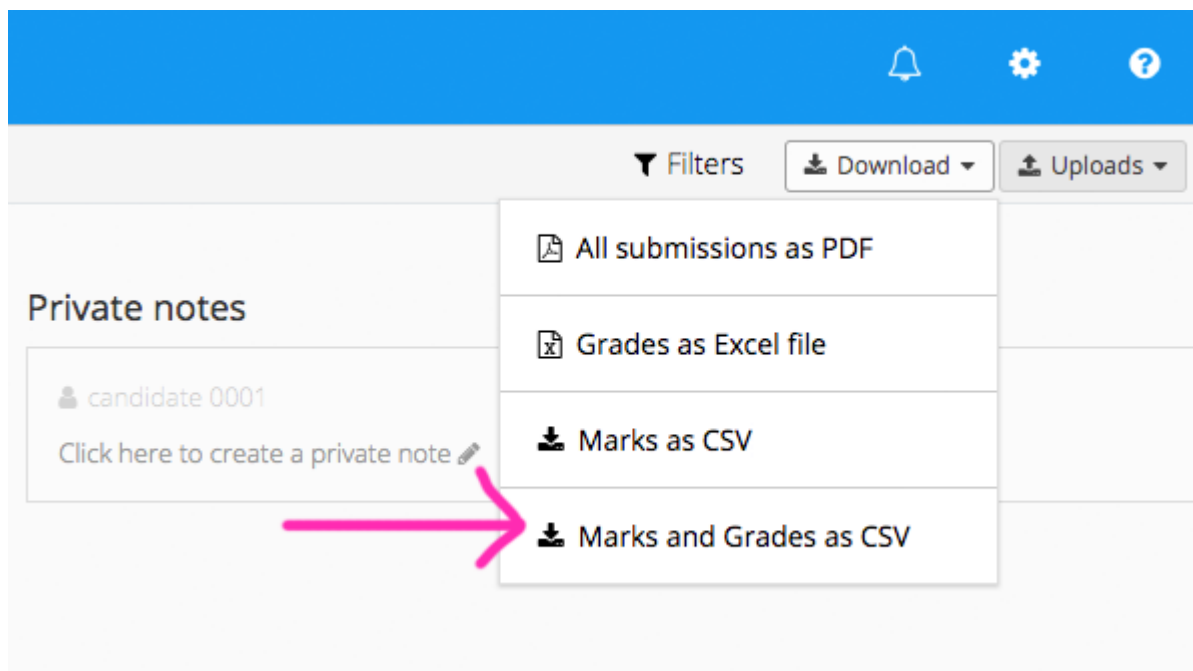

- In Inspera Assessment: The Grader downloads an Excel file containing all candidates to be graded. If any grades have already been set, these are also included in the file.
- In Excel, the Grader enters grades pr. candidate. Empty entries are ok.
- In Inspera Assessment, the Grader uploads the updated XLS file. The grades are then automatically updated in Inspera Assessment.

Interested in participating in the beta? Contact [Inspera Service Desk](#).

---

## Download marks and final grades as CSV\*

The new export will contain both score per question and the final grade.

*Note the new unified position of Downloads in Grading*

## OTHER IMPROVEMENTS AND BUG FIXES

- Improved info to candidates for auto-submitted tests
- Fixed issue when synchronising "FS Sensurfrist".
- Fixed issue when replacing Mark Scheme file in Grading
- Improved support for IE11
- Printing Inline Choice questions: Now showing all alternatives when "Show correct answers" is selected.
