

We hope you found the seminar useful and enjoyable. We did!

Inspira Assessment was updated 6th October 2017

Welcome to Release Webinar Tuesday 10th October 14.30 - 15.00 CET. [Sign up here.](#)
Next releases are scheduled 16th October and 10th November 2017.

Hvorfor får jeg denne på engelsk?

We are discontinuing Release Notes in multiple languages. [Inspira Hjelp og Opplæring](#) and [Inspira Kunskapscentrum](#) will be updated as normal.

IMPORTANT

The October 6th release has been split in two

The following features will only be available for selected institutions until 16th October:

- Randomized Sketch Codes (Now in closed beta with UiB)
- Inspera Scan (Now in closed beta with UiB)
- New content lists (Now in closed beta with UiO)
- Inspera SEB Beta (Now in closed beta with UiB)

We apologise for any inconvenience. More details further down in this email.

SEB configuration updated

September 15th 2017 we updated the SEB configuration so that Chrome-based browsers (Chrome, Opera, Vivaldi and others) are shut down when starting Safe Exam Browser version 2.1.5 and newer. Students are informed prior to starting the test.

Firefox is now also automatically closed upon SEB startup.

SEB password extended to 6 characters

For safety reasons, the SEB password is changed from 4 to 6 characters, requiring both letters and numbers.

SEB password:	zx3916
---------------	--------

The new default SEB password is 2 letters and 4 numbers.

Known issues upon release

- Knowledge Base is in the process of being updated
- Selected captions are flagged for review early next week

Keep reading this email to learn more about what's new.

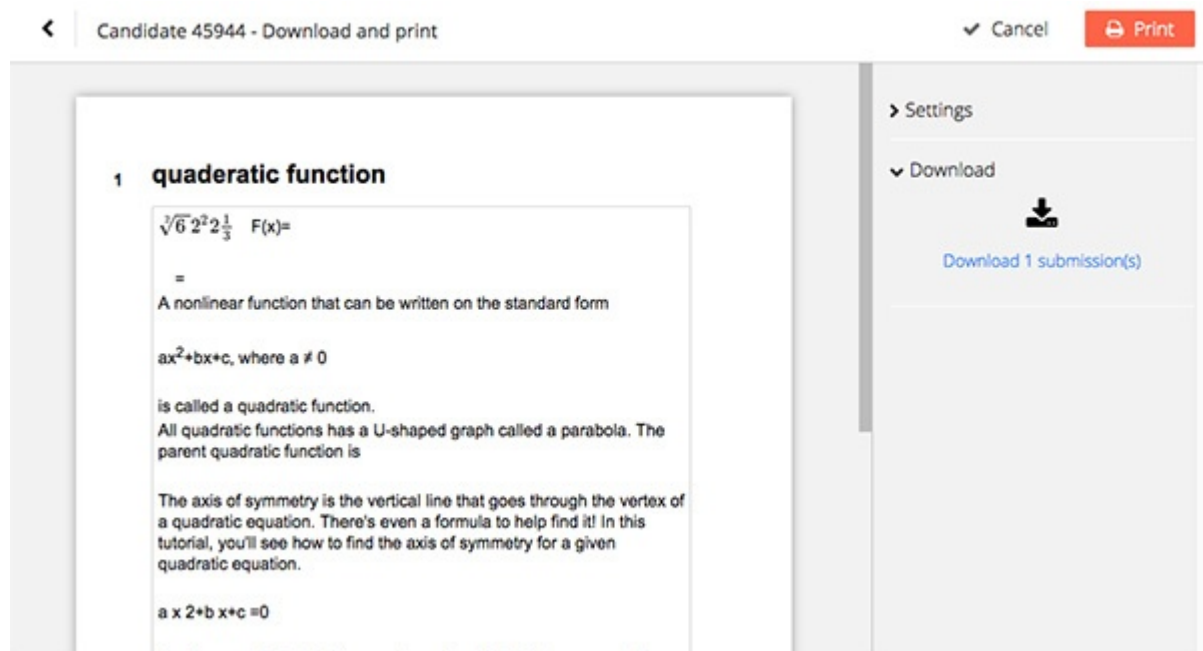

Have a nice weekend!

The Inspera team

NEW FEATURES - OCTOBER 6TH

** Starred features require activation through Inspera Service Desk*

Print and Download Manager

The new Print and Download Manager is an important update to Inspera Assessment. Now available in Deliver, Grading and Student Dashboard, it improves PDFs, printing and downloading in many ways:

- Faster PDF generation
- Improved performance for large files
- Informative and sortable file names
- Uploaded files will be renamed to match candidate ID.
- All external files included in ZIP packages (Attachments, File uploads, etc)
- Unified layout for screen, PDF and print versions
- Batch-download multiple submissions from Monitor

Known issues upon release

- ZIP filenames do not yet include Test titles.
- Missing caption in PDF cover page. Scheduled for fix during weekend.

Please note. For safety reasons, the Print and Download Manager will be activated gradually across institutions during the next few days.

Essay Temporary Backup Snapshots

The purpose of Temporary Backup Snapshot in Essays is to enable candidates and invigilators to restore lost work in the case of broken undo / redo history. The purpose is not to empower candidates with revision control.

Using the snapshots, candidates can roll back and restore Essay responses to an earlier version within the same active session. A new snapshot is taken every 15 minutes, and is saved in the browser memory. Restoring a snapshot will also take a new snapshot of current work, enabling candidates to roll forward to the newest version if needed.

Important. Snapshots are only saved in browser memory. Not to the server. This means:

- Snapshots are **ONLY** available within the same, active session:
 - Refreshing the browser (not possible in SEB) will clear saved snapshots
 - Logging out will clear saved snapshots
- Navigating between questions will **NOT** clear saved snapshots

Essay Formula Editor

Using the Essay Formula Editor, candidates can add inline formulas in Essays.

Known issue upon release:

A bug in Chrome causes the focus not to be changed to the math input field when opening the Formula editor.

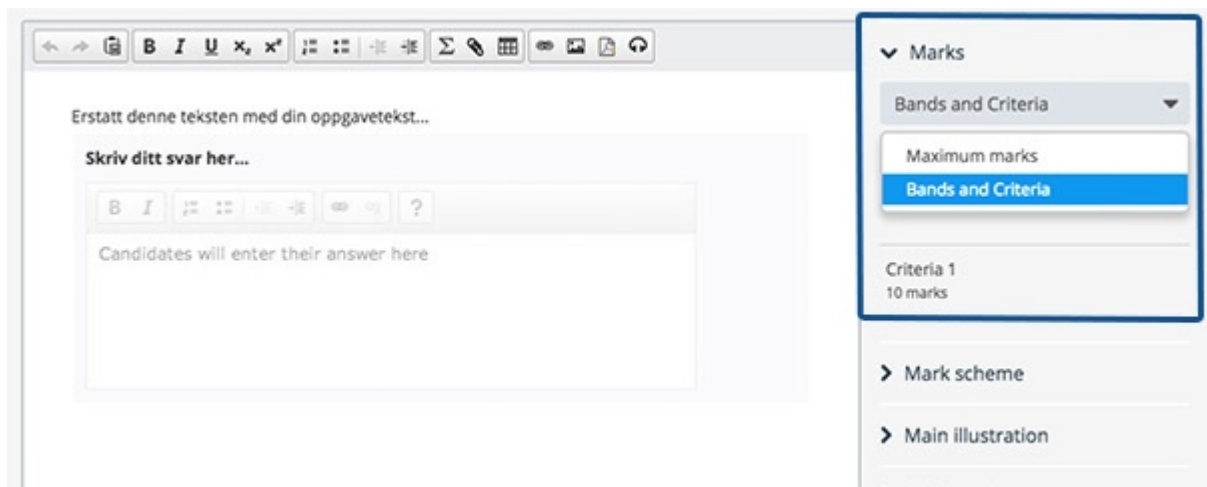

Essay Full Screen Mode

Using the Essay Full Screen Mode, students can expand the input area. The editor is then maximized beneath the info-header, so that remaining time and other messages are still visible.

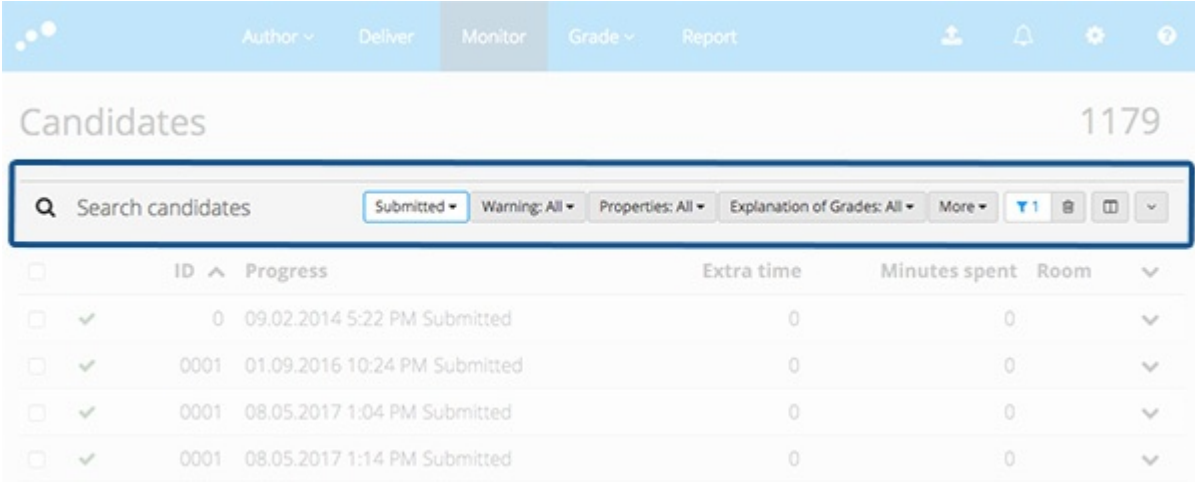

Essay Bands and Criteria*

Using Bands and Criteria for Essay, authors can now enable graders to mark by categories / criteria (Problem solving, Mathematical models, etc) and reward marks using thresholds / bands pr. category.

Monitor Search and Filters

	ID	Progress	Extra time	Minutes spent	Room
<input type="checkbox"/>	0	09.02.2014 5:22 PM Submitted	0	0	
<input type="checkbox"/>	0001	01.09.2016 10:24 PM Submitted	0	0	
<input type="checkbox"/>	0001	08.05.2017 1:04 PM Submitted	0	0	
<input type="checkbox"/>	0001	08.05.2017 1:14 PM Submitted	0	0	

As the first step of unifying all lists in Inespera Assessment, we are now releasing an improved Monitor Search and Filter bar:

- Search directly with no clicks
- Reset all filters with one click
- Active filter count indicator
- Search within dropdowns for filters and columns

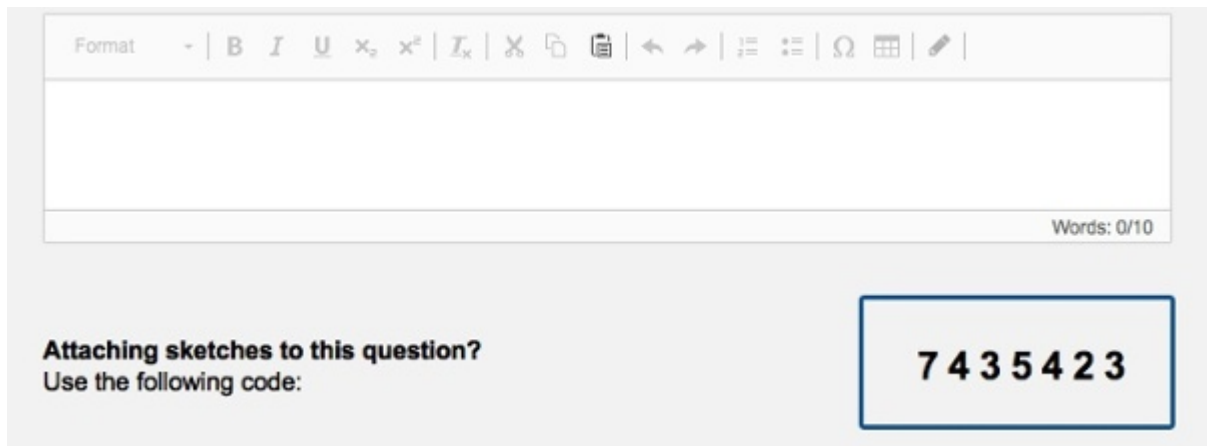

Other improvements

- Configuration: Support for managing UI languages pr account.
- Grading: Improved loading of Annotation PDF
- Monitor: Improved sorting for Committees
- Monitor: Fixed bug in Dashboard Widgets not saving all filters
- Spanish language support
- Fixed bug related to inserting many elements in Math Entry
- Fixed bug that in rare cases hid the player options button
- Improved language support for emails

IN BETA FROM OCTOBER 6TH

Randomized Sketch Codes

- Closed Beta with University of Bergen
- Scheduled for general release **October 16th 2017**

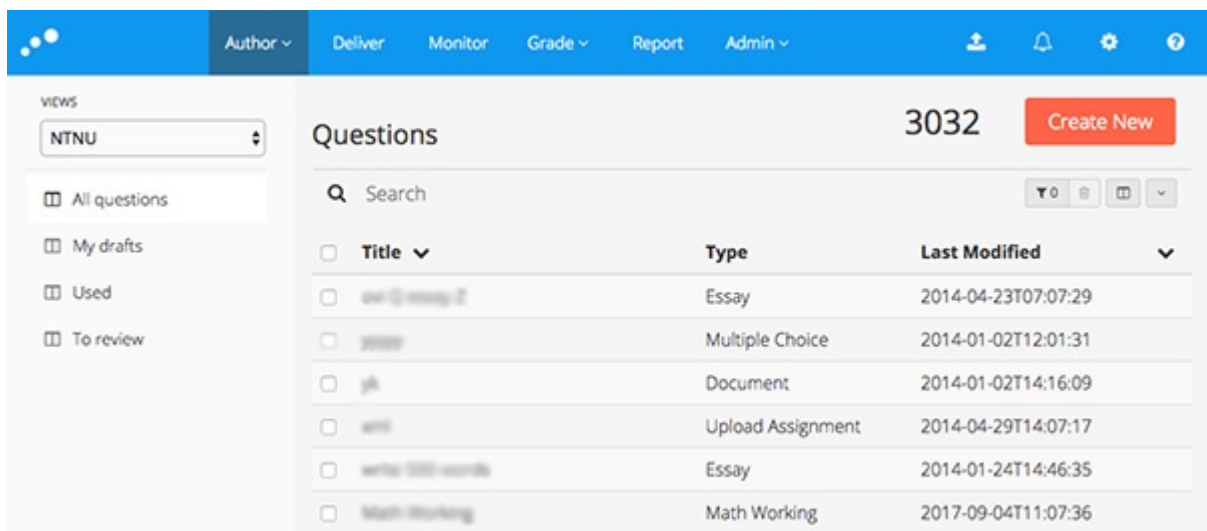

Randomised codes prevent sketches with single number errors to be attached to other candidates within the same test.

No actions are needed from your side. Existing sketch sheets, scanner applications and user guides will still be valid. To order more paper, visit www.inspera.com/scantron

New content lists*

- Closed BETA with University of Oslo
- Scheduled for general release **October 16th 2017**
- Will be rolled out over time and **customer by customer**

Questions, Question sets and Tests will now be listed by using the same technology as Monitor (Elastic Search). This will give authors, admins and graders a faster, more effective and unified user experience:

- Responsive, accessible and more compact navigation
- Dashboard Widgets available in the new Views left panel
- Ready for Shared Views by Account Managers (New role Q4 2017)

Inspera SEB lockdown browser*

- Closed Beta with University of Bergen

- Scheduled for general release **Q1 2018**
- Plus package
- Standard SEB will still be supported

Inspera SEB is a Closed Source lockdown browser based on Safe Exam Browser. It improves checking forbidden processes on the candidate PC / MAC and includes candidate warnings prior to exam start. If one or more forbidden processes are running upon Inspera SEB startup, the candidate can terminate these with one click.

Please contact your Inspera project manager for more information.

Inspera Scan*

- Closed Beta with University of Bergen
- Scheduled for general release **October 16th 2017**
- Plus package

Inspera Scan is a PC application for scanning paper-based sketches with Scantron scanners. It can be used in addition to - or instead of ScanTools plus, for the following reasons:

- Color support
- More robust form recognition
- Easier to use and optimised for the Inspera Sketch workflow

Please contact your Inspera project manager for more information.

Question mark schemes*

- Closed Beta with Cambridge Assessment International Education
- Scheduled for general release **October 16th 2017**

GRADE | MATH - QUADRATIC FUNCTION > CANDIDATES > JOHN > QUESTION 1

< John Filters Download all submissions

Submission Question Plagiarism

Manual marks: 0/20 Use decimals

0 1 2 3 4 5

Mark scheme

Level 0	No rewardable material	0
Level 1	Simple comment if offered supported by some information. The material will be mainly generalised. There will be few, if any, links between comments offered. A limited number of sources have been identified and used.	1-5

Question Mark Schemes support rich text, tables, math and images.
