Release Note 22nd of June 2016.

Improvements

- Ladok (Sweden): Improved flexibility of Ladok-sync
- Authoring: Integrated documentation on advanced scoring
- Grading: Improved information on the consequences of changing *Marking workflow*

Invitation to Release Webinar

Thursday 23rd June, 12.00 - 12.30

Demonstration of new features. Q&A.

Register

Ladok (Sweden)

Graders can now be added to a test without unlinking the test from Ladok. This makes it possible to keep the synchronization with Ladok on throughout the grading process.

## Integrated documentation on advanced scoring

There are many options for automatic scoring in Inspera Assessment. It is now easier to gain a proper understanding of these options. We have documented each and every scoring mechanism in Knowledge Base and added links from the authoring tool.

For more information on scoring, [click here](#)

Improved information on the consequences of changing *Marking workflow*

It is the test planner who defines the *Marking workflow* on a test. Changing the workflow resets any marks given. Information on this is now displayed directly in the interface.
